HILANS CONSULTING

WHO WE ARE

HILANS Consulting LLC, is a minority owned certified company founded in 2010. Our goal is to deliver a range of perspectives in managing projects from development to a full production within the federal sectors.

HILANS has a proven track record with interdisciplinary expertise, security experts, innovators and data analytics. Our staff are qualified experts, problem solvers with the required education, training and experience of the industry that drives ingenuity in our solutions.

We pride ourselves on being innovators of information technology with security best practices and inspiring new horizons.

Our expansive portfolio includes cloud computing, cyber security, Software and Systems Engineering, data center engineering and general management consulting services. Our benchmark is to leave a lasting quality imprint in all the varied areas of our business.

We Leverage Technology to solve business problems.

IT CONSULTING

Cloud Computing

HILANS CONSULTING is a leader in cloud computing having led large enterprises to adopt cloud computing in a secure manner. Provides consulting and engineering services to all sizes for the core deployment models – public, private or hybrid clouds or service models – infrastructure-as-a-service, platform-as-a-service and software-as-a-service. Consulting services include cloud adoption decision making matrix, a comprehensive risk assessment of cloud computing and conducting security audits.

Software Engineering

</>

Consulting services that span the conception of ideas through requirements, design, development, testing, implementation and maintenance ofsecure software. Our Software architects and programmers possess bachelors and master's degrees in software engineering from universities in Ghana, UK, USA, Kenya, India and South Africa. Our staff also includes seasoned graphic designers and web developers as well.

Process Map and IT strategy

Expertise in implementing ITIL framework in small to medium size organizations. We are experts in Agile methodologies. We work with IT staff of all sizes to develop a roadmap for the successful adoption of agile methodologies. We also specialize in a comprehensive review of IT processes to prescribe efficient service delivery models that will expedite IT service delivery

Mobile Technology

Our expertise include developing mobile apps for corporations to enable their customers to self-service and for convenient service delivery. We can review existing mobile solutions and redesign them to fit modern technologies. Mobile solutions enhance customer experience, employee engagement, workplace productivity, collaboration, mobility, and wireless solutions.

HILANS CONSULTING

CYBER SECURITY

IT TRAINING AND STAFFING

STAFFING

HILANS CONSULTING has a robust framework to screen the best and brightest IT talent for our clients. From IT management, cybersecurity professionals, network engineers, programmers, general IT practitioners, and graphic/web designers, we have seen it all. We work with our clients to understand their business needs and collaborate to develop the appropriate strategy for staffing. Where necessary we provide staff augmentation as a short term measure to address pressing resource needs.

We spend time to understand our clients and our consultants on a personal level to provide the appropriate skill-set alignment. We will provide our clients a temporary or permanent worker depending on the need. Our guiding principle is that business should not suffer because of IT staffing needs. It is important to us to build a long-term relationship instead of quick short term gains. From large companies to SME and very small companies we are positioned to provide any level of staffing needs to deliver IT solutions for your business.
